Look and feel

Natural look

You can find many different wood decor foils for plastic windows. However, only the Realwood foils give your windows a particular look and a special feeling. Realwood foils do not shimmer as much as standard wood decor foils. They have an attractive embossing and give plastic windows the natural appearance of wood, even if they are not made of wood. Concerning the colour effect the new foils, which are available in six attractive plain colours, have a special appeal characterized by a surface, which is much closer to the look of genuine wood. The functional advantages cannot be denied, as they are convincing thanks to their high durability to the UV and weather resistance, and due to their surface structure they require little maintenance and are stain-resistant.

Your GEALAN partner will be pleased to provide assistance:
